检测报告 专业认证

实验室检测认证

Laboratory testing certification

我司始终将产品质量与消费者安全视为企业发展的核心命脉。每一款产品均经过公司内部专业实验室的全方位检测流程，从原料筛选、生产工艺到成品出厂，均实施严格的质量把控。检测环节涵盖安全性评估（如重金属、有害物质限量）、功能性验证（如耐久度、性能稳定性）及环保标准测试（如可降解性、低碳排放），确保产品性能卓越且符合国际/国内相关规范。

为进一步夯实品质公信力，我们特别委托全球权威第三方检测机构——SGS（瑞士通用公证行）进行独立认证。SGS检测报告以严苛的检测标准与中立的评估体系，为产品品质提供国际认可的权威背书。报告涵盖化学安全、物理性能、环保合规性等多维度指标，全方位验证产品达到或超越行业标杆要求。

Our company always regards product quality and consumer safety as the core lifeline of enterprise development. Each product undergoes a comprehensive testing process in the company's internal professional laboratory, from raw material screening, production technology to finished product delivery, with strict quality control implemented. The testing process includes safety assessment (such as heavy metal and harmful substance limits), functional verification (such as durability and performance stability), and environmental standard testing (such as degradability and low-carbon emissions) to ensure excellent product performance and compliance with relevant international/domestic regulations.

To further strengthen the credibility of our quality, we have entrusted SGS (Swiss General Notary Public), a globally authoritative third-party testing agency, to conduct independent certification. SGS testing reports provide internationally recognized authoritative endorsement for product quality with rigorous testing standards and a neutral evaluation system. The report covers multidimensional indicators such as chemical safety, physical properties, and environmental compliance, comprehensively verifying that the product meets or exceeds industry benchmark requirements.
